BASS BITING AND WILD DUCKS FLYING.

Good Sport for Fisherman and Hunter Now Down the River.

Bass are now biting briskly and wild ducks are flying on the Niagara River near Strawberry, Grand and Frog islands. Reports of good catches of bass are being made daily. The ducks are not numerous yet, but passing the islands in a rowboat one may get a glimpse of a few at almost any hour during the day.

William Lux, better known as "Finnie," the Mayor of Frog Island, states the bass fishing along his island has been exceptionally good during the past week. Persons fishing off the island dock have caught good-sized strings. Others have had good luck cruising around the island. The air on the river is bracing these days. For a refreshing tonic there is no medicine that can beat it.
